Tennis v3 Statistics Feeds

We package our comprehensive stats collection into the following feeds, each focused on serving specific information needs:

Competition Info – Provides the name, id, and parent id for a given competition.

Competition Seasons – Provides historical season information for a given competition. Competitions will return a maximum of three seasons of data, including current or newly created seasons.

Competitions – Provides a list of all available tennis competitions.

Competitions by Category – Provides a list of all available tennis competitions for a given category (ex. ATP, ITF, or WTA).

Competitor Merge Mappings - Provides the valid Sportradar Id in cases when two competitors have been merged into one. Mapping entries will remain in the feed for 7 days.

Competitor Profile – Provides biographical information for a given player, including current rank, historical statistics, and competition participation.

Competitor Summaries – Provides previous and upcoming match information for a given competitor, including statistics for past matches and scheduling info for upcoming matches.

Competitor vs Competitor – Provides previous and upcoming matches between two teams including scoring information and match statistics.

Complexes – Provides all complexes with venue information.

Daily Summaries – Provides match information for a given day including scoring and match statistics.

Doubles Competitions Played – Returns doubles competitions played and the partners a competitor played with.

Doubles Competitor Rankings – Provides the top 500 doubles competitor rankings for the ATP and WTA.

Doubles Race Rankings – Rankings for the ATP/WTA finals.

Doubles Rankings – Provides rankings in ascending order for doubles teams.

Live Summaries – Returns real-time updates for all currently live matches, including scoring and statistics.

Live Timelines – Provides a real-time play-by-play event timeline for currently live games.

Live Timelines Delta – Provides a 10 second live delta of game information, including scoring and a play-by-play event timeline.

Race Rankings – Returns a list in ascending order for the race to the ATP/WTA finals.

Rankings – Returns a rankings list in ascending order for singles competitors.

Season Competitors – Provides a list of competitors for a given season.

Season Info – Provides detailed information for a given season/tournament, including competitors and structure.

Season Links – Provides information about linked cup rounds for a given season/tournament. Use this feed to compile full advancement brackets for relevant seasons/tournaments. Links between all matches and rounds are available when competitors (TBD vs. TBD) are not yet known.

Season Probabilities – Provides 2-way win probabilities (home team win, away team win) for all matches for a given season.

Season Summaries – Provides schedule information and scoring for all matches from a given season

Seasons – Provides a list of historical season information for all competitions. Competitions will return a maximum of three seasons of data, including current or newly created seasons.

Sport Event Summary – Provides scheduling information, scoring, and statistics for a given match.

Sport Events Created – Provides ids for sport events that have been created in the last 24 hours.

Sport Event Timeline – Provides scheduling information, scoring, statistics and a play-by-play event timeline for a given match.

Sport Events Removed – Provides ids for sport events that have been removed or deleted.

Sport Events Updated – Provides ids for sport events that have been updated in the last 24 hours.

Push Events – Returns detailed, real-time information on every game event

Push Statistics – Returns detailed game stats at the doubles team or player level

Live Probabilities * - Provides top-level information for live matches. If probabilities are available for a match, pre-match and live probabilities will be displayed.

Season Outright Probabilities * - Provides a list of outright probabilities for each team from a given season.

Sport Event Probabilities * - Provides pre-match and live probabilities for a given match.

Sport Event Upcoming Probabilities * - Provides a list of IDs for upcoming sport events in the next 24 hours.

Timeline Probabilities * - Provides a timeline of pre-match and live probability changes for a given match.

* - Available only with the probabilities plan within the Tennis v3 package. See FAQ for details.

Tennis v3 Failover Information

If our scout feed goes down or becomes unavailable, Sportradar takes over Live Data Entry (LDE) to provide a failover.

In case of a failover, we follow one of the following scenarios:

1. *Continue point-by-point coverage – but lose service outcomes.* During the failover we cannot provide data related to service outcome. The following data will be unavailable: aces, double faults, and successful service outcome. Those statistics will be verified and updated post-match.
2. *If point-by-point coverage is not possible – we will update game-by-game, post-match.* During the failover we cannot provide point-by-point coverage and service outcomes. The following data will be unavailable: aces, double faults, and successful service outcome. Missing point-by-point coverage and statistics will be verified and updated post-match. Tie-break score will not be displayed. Game-by-game coverage will continue as each match ends.

Language Support

We provide support for a large set of languages. The language support primarily affects names of players, teams, tournaments etc. Different languages are obtained through different endpoints where the only difference is the language part of the path. The language part is any valid ISO-646 language code. For languages we don't provide specific translations for we return the names in English.

Code	Language
it	Italian
en	English
de	German
fr	French
se	Swedish
es	Spanish
ru	Russian
zh	Chinese (simplified)
zht	Chinese (traditional)
ja	Japanese
hi	Hindi
tr	Turkish
no	Norwegian
da	Danish
nl	Dutch
pt	Portuguese
fi	Finnish
th	Thai
hu	Hungarian
sr	Serbian
id	Indonesian
ko	Korean
srl	Serbian Latin

When translations are available, the following terms will be translated:

competitor name
competition name
sport name
category name
season name
group name
player name
venue name
venue city_name
venue country_name
info prize_currency

Frequently Asked Questions

Q: How can I find the values for various enum data points within the API?

A: Many enum values are listed in the FAQ below. For the most up-to-date values, please see the Schema section of the OpenAPI specification here: <https://api.sportradar.com/tennis/trial/v3/openapi/swagger/index.html>

Q: What is the Date format?

A: When we present date only values we present these in the ISO 8601 standard format.
ex: 2013-04-03

We use these for attributes that have date and no time (such as birthdate). For more information:
https://en.wikipedia.org/wiki/ISO_8601

Q: What time zone are the date time fields presented in?

A: All of our Date/Time attributes are in UTC, presented in the ISO 8601 standard format.

ex: 2013-04-03T18:15:00+00:00

For more information: https://en.wikipedia.org/wiki/ISO_8601

Q: What competitions are covered?

A: We cover the following competitions with the following coverage:

Tier 1: Grand Slams

Point-by-point live coverage for men's, women's, singles doubles, mixed doubles

Standard Match statistics live

Detailed service outcomes

Extended match statistics for quarter finals onwards for men's and women's singles (winners, errors, unforced errors broken down by a few shot types)

Post-match corrections

Court information

Tier 2: ATP1000, ATP Finals, ATP 500, ATP Cup WTA Finals, WTA 1000, WTA 500, WTA Elite Trophy, WTA Premier Fed Cup (World Group), Davis Cup (World Group)

Point-by-point live coverage for men's, women's, singles doubles, mixed doubles

Standard match statistics live

Detailed service outcomes

Post-match corrections

Court information

Tier 3: ITF

Point-by-point from Round 1

Standard Match Stats, (no detailed service outcomes)

No post-match corrections

No guaranteed court information

Tier 4: ATP250, WTA Int, WTA 250, WTA125k

Standard Match Stats from semifinals

Point-by-Point from semifinals

Post-match corrections from semifinals
No guaranteed court information

Tier 5: Challenger, Fed Cup (non-World Group), Davis Cup (Non-world Group)

No Point by Point
Game by Game Score or results only post-match
No post-match corrections
No guaranteed court information

General:

Schedules
Results
Player profiles (vital statistics only – not biographies)
Seasonal match outcome statistics for players
Rankings
Race Rankings
Pre-match probabilities
Basic tournament information

Q: Which statistics are considered extended match statistics?

A: Here are the extended match stats:

backhand_errors
backhand_unforced_errors
backhand_winners
volley_errors
volley_unforced_errors
volley_winners
forehand_errors
forehand_unforced_errors
forehand_winners
groundstroke_errors
groundstroke_unforced_errors
groundstroke_winners
lob_unforced_errors
lob_winners
overhead_errors
overhead_stroke_errors
overhead_winners
return_errors
return_unforced_errors
return_winners
service_unforced_errors
service_games_won
service_points_lost
service_points_won
tiebreaks_won
drop_shot_unforced_errors
drop_shot_winners

Q: When are standard match stats available?

A: Standard match stats are available whenever live point-by-point coverage is true.

Q: What are the standard match statistics?

A: Here are the available standard match stats?

games_won
max_games_in_a_row
max_points_in_a_row
points_won
breakpoints_won
total_breakpoints
first_serve_points_won
first_serve_successful
aces
double_faults
second_serve_successful
second_serve_points_won

Q: What are the definitions for the various statistics?

A: Here are the definitions for the various statistics:

General definitions:

- Racket arm: The arm with which the player serves and holds the racket. It is used to define if a player is right-handed or left-handed.
- Stroke/Shot: The act of striking the ball with the racket.
- Serve: Short for Service.
- Server: The player who serves.
- Returner/Receiver: The player who receives the serve.
- Return: A shot used to hit back the serve.
- Forehand: A shot hit from the racket-arm side of the body. The stroke used to return balls hit to the right side of a right-handed player and to the left side of a left-handed player. Forehands are commonly hit one-handed.
- Backhand: A stroke in which the ball is struck on the opposite side of the body to the racket arm. The stroke is used to return balls hit to the left side of a right-handed player and to the right side of a left-handed player. Backhands are hit either one-handed or two-handed.
- Groundstroke: A stroke made after the ball has bounced. The standard shot in tennis. Can be either forehand or backhand.
- Volley: During play, a shot where the ball is hit before it bounces. Can be either forehand or backhand.
- Overhead: During play, a stroke made with the racket above the head in a motion similar to that of an overhand serve.
- Drop Shot: A softly hit ball (usually with backspin) that drops near the net after crossing it. Is hit either as a groundstroke or a volley and can be either forehand or backhand.
- Lob: A stroke that lifts the ball high in the air, usually over the head of the opponent at the net. Is hit either as a groundstroke or a volley and can be either forehand or backhand.

Sportradar Definition – Winners

- Winner: A winner is any shot that is hit successfully into the opposite side of the court that the opponent can't manage to get a shot at. It can either be a clean hit without any racket touch or where the opponent only manages to

slightly touch the ball (racket clip). Important is that the opponent cannot manage to hit a proper shot. All the below specifications count as Winners in Statistics.

- Ace: A ball that is served without an opponent (receiver) touching the ball with the racket (usually due to well executed serve)
- Return winner: A direct winner hit when returning serve. Can be either forehand or backhand.
- Groundstroke winner: A winner hit as a groundstroke. Can be either forehand or backhand.
- Volley winner: A winner hit as a volley. Can be either forehand or backhand.
- Overhead winner: A winner hit as an overhead shot.
- Drop shot winner: A winner hit as a drop shot. Has to be either groundstroke or volley and can be either forehand or backhand.
- Lob winner: A winner hit as a lob. Has to be either groundstroke or volley and can be either forehand or backhand.

Sportradar Definition - Forced errors

- Forced error: An unsuccessful shot caused by an opponent's good play. Primarily defined when the player who made the error is under time pressure or is on the move/on the defense during the shot execution. If one of those factors is true, then the player was forced into a difficult situation by a good shot and thus made a forced error. All the below specifications count as Forced Errors in Statistics.
- Return forced error: A forced error caused by an opponent's serve, player gets racket to the ball but is unable to put it in play (incl. Racket Clip).
- Groundstroke forced error: A forced error while trying to hit a groundstroke. Can be either forehand or backhand.
- Volley forced error: A forced error while trying to hit a volley. Can be either forehand or backhand.
- Overhead forced error: A forced error while trying to hit an overhead shot.

Sportradar Definition - Unforced errors

- Unforced error: An unsuccessful shot due to an error without being forced under pressure by the opponent. All the below specifications count as Unforced Errors in Statistics.
- Double fault: Two faults served in a row. On a double fault, the server loses the point.
- Return unforced error: An unforced error while trying to hit a return of serve. Can be either forehand or backhand.
- Groundstroke unforced error: An unforced error while trying to hit a groundstroke. Can be either forehand or backhand.
- Volley unforced error: An unforced error while trying to hit a volley. Can be either forehand or backhand.
- Overhead unforced error: An unforced error while trying to hit an overhead shot.
- Drop shot unforced error: An unforced error while trying to hit a drop shot. Has to be either groundstroke or volley and can be either forehand or backhand.
- Lob unforced error: An unforced error while trying to hit a lob. Has to be either groundstroke or volley and can be either forehand or backhand.

Q: How long are matches stored in the deleted/updated matches endpoints?

A: The deleted/updated matches endpoints will show sport events removed or updated in the last 2 weeks.

Q: How do venues work for country vs country competitions?

A: In country vs country competitions such as Davis Cup and ATP Cup, venues on the parent matches refer to the complex in which the courts are located. On the child match level, venue refers to the court where the match is played. Note that only the finals venue will be linked to complex attribute for the Davis Cup competition.

Q: How does sport event type work in the feeds?

A: The sport_event_type explicitly denotes the match type. Where there are competitions which have "parent matches" and "child matches" where country_format='true', such as Davis Cup and ATP Cup, this attribute will only appear on the "child match" node. The "parent match" sport_event node will have a "type='parent'" attribute and the "competition" node will have a "type='mixed'" attribute. Otherwise, for competitions where "country_format" is not present, the competition will have a type either "singles" or "doubles".

Q: How do I detect when one player has "advantage" in the case where the players both reached "40" or "deuce"?

A: The player who has "advantage" will have a score of "50" in the timeline, for example this is how a game was won by the receiver after a server committed a double_fault when the receiver was at "advantage":

```
<event id="691865865" type="point" time="2020-05-29T11:30:37+00:00" home_score="50" away_score="40" server="away" result="double_fault" first_serve_fault="true"/>
<event id="691866221" type="period_score" time="2020-05-29T11:31:22+00:00" period="2" home_score="4" away_score="4" server="away" result="receiver_won"/>
```

In addition, when in a live situation the "game_state" node will display the following:

```
<game_state home_score="50" away_score="40" serving="away" last_point_result="receiver_winner" advantage="home" tie_break="false"/>
```

Q: Why do some players have height and weight data and others don't?

A: Only the height and weight of the top 500 ranked players for ATP and WTA are included. There may be some instances where some players outside of the top 500 have these attributes but should not be relied upon.

Q: What are the valid sport_event_status – status values?

A: Status values can change over time, and new values may be added when needed. Here is a list of the currently valid status values and their definitions:

- not_started – The match is scheduled to be played
- started – The match has begun
- postponed – The match has been postponed to a later time
- match_about_to_start – The match time has expired, awaiting play
- live – The match is currently in progress
- closed – The match results have been confirmed.
- ended – The match is over
- interrupted – The match began, but coverage has stopped for a short time. Note that match scores may not be updated during this period, the last recorded match score will be displayed instead
- suspended – The match began, but has been suspended to a later time
- cancelled – The match has been cancelled and will not be played
- delayed – The match has been temporarily delayed and will be continued

Q: What are the valid sport_event_status – match_status values?

A: Match status values can change over time, and new values may be added when needed. Here is a list of the currently valid match status values and their definitions:

not_started – The match is scheduled to be played

match_about_to_start – The match time has expired, awaiting play

start_delayed – The match has been temporarily delayed and will be continued. Matches are manually moved to this status 15 minutes after the scheduled start time.

1st_set – First set

2nd_set – Second set

3rd_set – Third set

4th_set – Fourth set

5th_set – Fifth set

ended – The match is over

walkover – The match ended in a walkover

interrupted – The match began, but is stopped for a short time

suspended – The match began, but has been suspended to a later time

cancelled – The match has been cancelled and will not be played

postponed – The match has been postponed to a future date

retired – The match is incomplete as the result of one player

defaulted – The match has ended as a result of one player being disqualified

Q: How do I find out the coverage for a particular match?

A: Find the node called: “coverage – type” which denotes if the match is covered at the sport_event or competition level. When type=“sport_event” you will only get sport_event_properties. When type=“competition” you will get sport_event_properties and competition_properties. Within coverage, scores states if the match is scored live or post. Extended stats show if we have enhanced stats for the sport event.

Q: Is the statistical data provided in the Tennis API official data?

A: Sportradar collects sports data independently. For some sports Sportradar is the official data provider. In the case of Tennis, we provide official data for ITF tournaments only.

Q: What prompts a match to appear in Sport Events Updated?

A: Changes to score, match status, or schedule in last 24 hours would cause a match to display in this endpoint.

Q: How will a sport event behave when it is not covered with live scores?

A: When a sport_event is not covered live, the status and match_status will remain as not_started until results are entered post-match.

Q: How are “live” feeds handled in the API?

A: Sport Events appear in the feed 10 minutes before the scheduled start time and are removed 10 minutes after the Sport Event is ended.

Q: What is the probabilities package?

A: The probabilities package is an add-on set of feeds that are an extension of the Season Probabilities feed in the main package (which already provides pre-match probabilities for the sport event winner market). The main features of the Probabilities extension are: Live Probabilities that update throughout game, Season Outright Probabilities for the Tournament Winner market, and Live Probabilities Coverage indicator for the next 24 hours.

Q: Is there Live Probability coverage for every game you cover in the Tennis API?

A: Live Probability coverage depends on a number of factors, and we can't guarantee that every game will be covered for any given competition. However, Sportradar covers tens of thousands of sport events across hundreds of leagues. For individual competition coverage, contact sales@sportradar.com

Q: Why can't I find a particular match in Daily Summaries or Sport Events Updated feeds?

A: These endpoints support pagination and return 200 entries by default. To return more matches, an additional query string parameter must be used after your API key. For example, appending *&start=200* will return the next 200 entries per page, *&start=400* will return the next 200, and so on.

Q: When are placeholder competitors used?

A: We will create fixtures in advance when details are confirmed (fixed draw competitions only). For competitors that have placeholder names, we will display *virtual="true"* until the competitor qualifies for the match and replaces the placeholder. Placeholders are not used for qualifiers.

Q: What are the possible values for *cup_round - state* in the Season Links feed?

A: Listed below are the values and definitions for *cup_round - state*. These can be leveraged to determine the status of a cup round.

- empty - A matchup has been created but neither the match details nor the competitors are known.
- unseeded_fixture - Match details are known but competitors are unknown.
- partial_seeded - One competitor is known.
- partial_seeded_fixture - Match details and one competitor are known.
- seeded - Both competitors are known.
- seeded_fixture - Match details and both competitors are known.
- unstarted - Match(es) have been added.
- on_going - The first match has started.
- decided - The last match has ended.
- winner - The winner is known.
- cancelled - The matchup has been cancelled.

Document Change History

Date	Section	Change
08/30/2023	Competition Info	Added three new data points to the season level of competitions: Number of Competitors, Number of Qualified Competitors, and Number of Scheduled Matches.
08/28/2023	Sport Event Information	Added a `active_season` attribute for newly created matches appearing in the Sport Events Created endpoint.
03/28/2023	Competition Info	Added a new 'Competitions by Category' endpoint. This endpoint can be used to retrieve all competitions within a certain category/tournament, rather than the complete competition list found in 'Competitions'. For example, you may now retrieve only ATP, ITF, or WTA competitions.
03/20/2023	Competition Info	Added 'order', 'state', and 'winner_id' to cup rounds in the Season Links endpoint.
01/20/2023	Sport & Category Information	Added category information (id, name, country_code) to the Competition Info endpoint.
11/29/2022	Timeline Information	Added 'updated' and 'updated_time' flags to the Push Events feed to better display which events have been updated.
09/13/2022	Competitor & Player Information	Added competitor seed and bracket number to all Summaries and Timeline endpoints.
09/02/2022	FAQ	Added a FAQ detailing the entry process for placeholder competitors.
08/23/2022	Mapping Information	Added data points to support the new Competitor Merge Mappings endpoint.
07/21/2022	Sport Event Information	Added an 'estimated' boolean attribute to display whether an estimated start time for a match has been entered.
06/27/2022	Sport Event Information	Support added for new Sport Events Created feed.
11/03/2021	Competitor Information	Added bracket number, qualification path, and seed at the competitor level for relevant tournaments. Added surface type for complexes.
	Competition Information	Added 'alternative_name' attribute to provide common tournament names.
	Competition Information	Added data points in support of the new Season Standings feed.
	Competitor Information Standings & Ranking Information	
10/15/2021	FAQ	Added a pagination support description for the following feeds: Daily Summaries, Season Summaries, Sport Events Updated.
06/04/2021	Category & Sport Information	Added data points to support the addition of the following probabilities feeds: Live Probabilities, Season Outright Probabilities, Sport Event Probabilities, Sport Event Upcoming Probabilities, Timeline Probabilities.
